

Silicone Half Mask Respirator With PRESSCHECK™ Filters

Respirator Fit Testing Gets Personal!

The Silicone Half Mask Respirator with Press To Check™ Filters is a unique system, engineered to enable self assessment of the Silicone mask's seal for better protection every time you use it.

On an ill-fitting mask, hazardous airborne particles may flow through gaps where the mask meets the face.

Press To Check™ is a personal fit test system that can be administered anytime and anywhere.*

FEATURES AND BENEFITS

Soft and durable Silicone for an airtight and a secure seal

Retro-reflective tape for improved wearer visibility

Contour moulded nose piece for good fit with glasses and goggles

Can be worn under most welding helmets

Enhanced bolstered four point cradle suspension for improved load bearing

Co-moulded cartridge dock for easy on/off cartridge connection

Low Profile Design for minimum visual impairment

Press To Check™ filters are a revolutionary filter cartridge system that allows you to self assess the seal of your mask

Silicone for a better seal

Retroreflective tape for improved wearer visibility

* Press to Check is an additional safety feature allowing the user to easily fit test check their mask before each use. This will ensure a good seal every time. The Press To Check does not replace a qualitative or quantitative fit test in accordance with AS/NZS1715.

FIT

DON THE MASK

Put the straps and harness over head and pull straps to a secure fit

PRESS

PRESS TO CHECK™

Close off air flow by pressing front and back of both filter covers

CHECK

INHALE

No air should flow through the mask

Technology

Air flows through the P3* filter in strategically positioned air vents located around the Press To Check™ cartridge. Once these vents are closed off no air can get in or out allowing the wearer to self assess their own face mask seal, keeping them safer on site.
