

The UniSafe polycarbonate visor material is best to select for resistance to impact and water-based liquids (biological, acids and weak solvents).

Polycarbonate visors come in three thicknesses: 0.76mm, 1mm and 1.5mm.

- 0.76mm polycarbonate visors provide medium impact protection.
- 1mm and 1.5mm polycarbonate visors provide high impact protection

UniSafe Polycarbonate Visors fit the UniSafe browguard (VV997) or the VH500 (non-peaked), VH500P (peaked) or VV765 and VV766 visor holders.

VISORS

POLYCARBONATE CLEAR VISORS

- Faceshields are necessary when a splash to the face might occur. When fitted correctly faceshields provide effective protection against objects travelling at high speed. It is recommended that with all faceshields secondary eye protection should be worn.
- For harsh chemicals and high molten metal applications use Thermotuff+ visors. Please refer to the respective Technical Datasheet.
- UniSafe Polycarbonate visors fit the UniSafe browguard (VV997) or the VH500 (non-peaked), VH500P (peaked) or VV765 and VV766 visor holders.
