

11333 SHARPENER BLADE REPLACEMENT

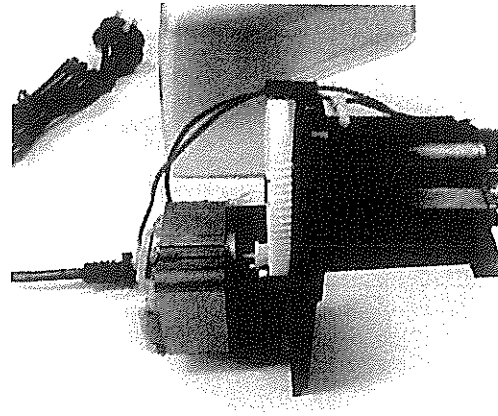

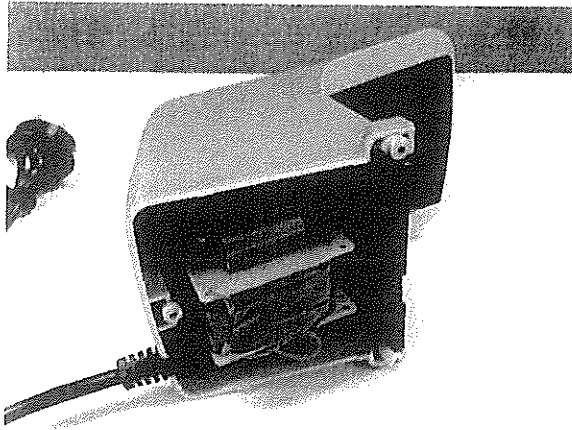

***Important safety instructions. Ensure the sharpener is not plugged in to power source.

Tools Required

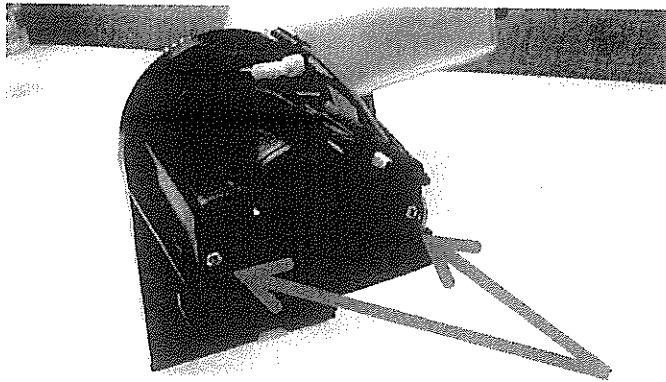

Phillips screwdriver

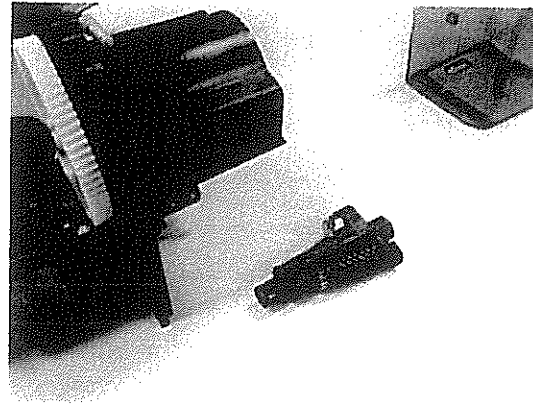

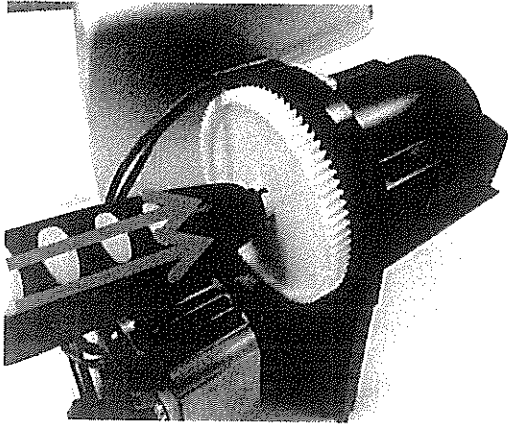

1. Ensure sharpener is not plugged in to power source
2. Remove shavings tray
3. Remove 3x screws as pictured

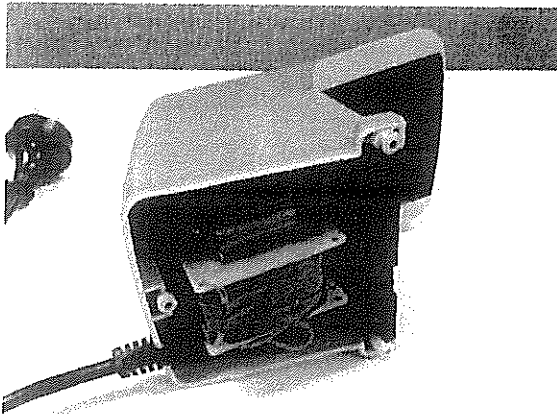

4. Place sharpener on side and gently remove motor/cutting assembly from casing. Place motor/cutting assembly upright

5. Remove 2x screws as pictured.

6. Using the reverse end of screwdriver push in centre. The cutting blade will pop out.

7. Replace sharpener and reassemble as per steps 1 - 6 in reverse
