

Ecolab Total Hand Hygiene System

Clean without a doubt.

A top-down view of a petri dish containing a bacterial culture. The agar surface is covered with numerous small, dark, circular colonies of varying sizes. The lighting is somewhat uneven, with a brighter area in the center and darker areas towards the edges. The text is overlaid on this image.

**WHY AREN'T
EMPLOYEES
GETTING THEIR
HANDS CLEAN?**

WHY HAND HYGIENE IS SO IMPORTANT...

an estimated
80%
of all infections
are transmitted
by hands.¹

3
Days
is the amount of time
some germs can live
on moist surfaces.²

95%
of people don't
wash their hands
adequately.³

THERE ARE A HANDFUL OF REASONS WHY ITS OFTEN A CHALLENGE

- 1 **Low awareness** of the impact of foodborne illnesses and how they can be prevented
- 2 **Wash without soap** and just rinse with water
- 3 **Lack of formal training** on proper hand hygiene procedures
- 4 **Equipment failure** and poor product inventory create compliance issues
- 5 **The "ick factor"** resulting from messy and dirty dispenser areas make them squeamish

Nexa Classic Manual

The Nexa™ Answer

Efficiency and sustainability in a new, innovative dispenser.

At Ecolab, we have developed a new hand hygiene program that combines advanced chemistry with technology and training, making your hand cleaning habits efficient, safe and simple.

A Side-by-Side Comparison

Ecolab's Nexa Dispenser vs. Traditional Dispensers

SAVE MONEY

Nexa's energy saving Touch-Free dispenser requires fewer battery change-outs.¹

44%
FEWER
BATTERIES

PROTECTIVE COATING

The antimicrobial protection in Nexa's manual dispenser pushbar works to inhibit the growth of bacteria, mould and mildew that can cause degradation of the dispenser.

REDUCED WASTE

Nexa's improved HDPE² packaging is not only recyclable, it also helps to maximise product evacuation.
